

PERFECT PERFORMANCE

Original Ergoline UV lamps deliver the perfect performance and quality you would expect from the Number One – and will continue to do so. Perfect for every sunbed and every EU requirement.

You can obtain more information on the original Ergoline UV tubes from your dealer or at www.jk-licht.de.

Ergoline

THE REAL ERGOLINE: **ORIGINAL POWER FROM THE NUMBER 1**

Ergoline's trendsetting UV systems makes it the Number One worldwide. The basis of every UV technology is the UV components in the sunbeds. The Ergoline UV lamp portfolio is tailor-made for the Number One professional sunbeds. Because direct proximity to the development centre guarantees optimum orientation of the UV lamps to the Ergoline sunbeds: for perfect tanning results all around and satisfied customers!

THE HIGHLIGHT OF EVERY ERGOLINE SUNBED: **ORIGINAL ERGOLINE UV LAMPS**

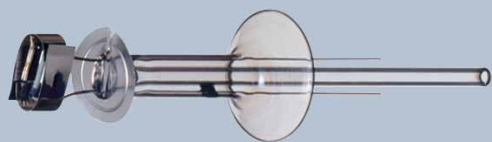

State-of-the-art manufacturing methods guarantee constantly high quality for absolute reliability and long life in the tough daily environment of the studio. The JK-Licht seal guarantees certified safety. So you will get the right UV lamp and the right high-pressure lamps for your sunbed and for every EU requirement. The JK-Licht team will be glad to help you make the right choice at any time!

THE MARKET LEADERS RECOMMEND: **ERGOLINE SUNBEDS WITH ORIGINAL UV COMPONENTS**

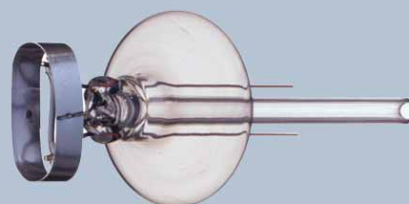

The Dynamic Power and Ergoline UV tubes provide high performance, with a life of up to 1,200 hours. This excellent result is obtained by using Dynamic Power at the appropriate setting.

The perfected long mount technology provides optimum cooling. New style jackets, refined phosphor (neon/argon gas mixture) and an extra protective coating for the phosphor support this effect. The result: longer life and an improved tanning result.

The UV lamps with short mount technology have also been perfected down to the last detail. Here, too, the protective phosphor coating brings about a life improvement of up to 800 hours despite the short mounts. This means that an optimised tanning result is, in combination with the highly developed cooling systems of the Ergoline sunbeds, also achieved here.

Comparison: long mount...

... and short mount tubes
